

New York Life Global Funding

\$11,000,000,000
GLOBAL DEBT ISSUANCE PROGRAM

This supplement (“Base Prospectus Supplement”) is supplemental to and must be read in conjunction with the Offering Memorandum dated March 25, 2014 (the “Offering Memorandum”), as supplemented by a first base prospectus supplement dated June 6, 2014 and a second base prospectus supplement dated September 2, 2014 prepared by New York Life Global Funding (the “Issuer”) under the Issuer’s \$11,000,000,000 Global Debt Issuance Program for the issuance of senior secured medium-term notes (the “Notes”).

This Base Prospectus Supplement has been approved by the Central Bank of Ireland, as competent authority under Directive 2003/71/EC (the “Prospectus Directive”). The Central Bank of Ireland only approves this Base Prospectus Supplement as meeting the requirements imposed under Irish and EU law pursuant to the Prospectus Directive.

This document constitutes a base prospectus supplement for the purposes of Article 16 of the Prospectus Directive. References herein to this document are to this Base Prospectus Supplement incorporating Annex 1 hereto.

On November 13, 2014, New York Life Insurance Company (“New York Life”) published its interim statutory statements as of September 30, 2014 (including any notes thereto, the “Third Quarter 2014 Statutory Statements”), and on November 21, 2014 made available New York Life’s Summary of Certain Third Quarter Financial Information, Certain Financial and Accounting Matters, Statutory Capitalization of New York Life, and Selected Historical Statutory Financial Information of New York Life (collectively, “Certain Third Quarter 2014 Financial Information”). The Certain Third Quarter 2014 Financial Information and the Third Quarter 2014 Statutory Statements are set out in Annex 1 to this document. Copies of the Certain Third Quarter 2014 Financial Information and the Third Quarter 2014 Statutory Statements will be made available for inspection at the offices of the parties at whose offices documents are to be available for inspection as identified in “General Information” in the Offering Memorandum.

Except as disclosed in this document, there has been no other significant new factor, material mistake or inaccuracy relating to the information included in the Offering Memorandum.

Each of the Issuer and New York Life accepts responsibility for the information contained in this Base Prospectus Supplement. To the best of the knowledge of each of the Issuer and New York Life (having taken all reasonable care to ensure that such is the case) the information contained in this Base Prospectus Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information.

Where there is any inconsistency among the Offering Memorandum and this Base Prospectus Supplement, the language used in this Base Prospectus Supplement shall prevail.

Base Prospectus Supplement dated December 1, 2014

ANNEX 1

SUMMARY OF CERTAIN THIRD QUARTER FINANCIAL INFORMATION

Unaudited Results of Operations – For the nine months ended September 30, 2014 Compared to the nine months ended September 30, 2013

Net Income

Net income, which is net gain from operations plus net realized capital gains (after-tax and transfers to the interest maintenance reserve (“**IMR**”)), was \$429 million for the nine months ended September 30, 2014, which represented a \$70 million decrease from the net income of \$499 million reported for the nine months ended September 30, 2013. The decrease was driven by net realized capital losses of \$39 million for the nine months ended September 30, 2014 as compared to net realized capital gains of \$76 million for the nine months ended September 30, 2013 (see “—Net Realized Capital Gains/(Losses)”), which were partially offset by a \$45 million increase in net gain from operations.

Net Gain from Operations

Net gain from operations after dividends and federal income taxes for the nine months ended September 30, 2014 was \$468 million, and primarily consisted of investment spread income and earnings from mortality spreads. For the nine months ended September 30, 2014, net gain was \$45 million, or 10.6%, higher than the \$423 million reported for the nine months ended September 30, 2013. The increase was primarily driven by the following:

- \$169 million increase in net investment income primarily due to higher distribution income on limited partnerships (see “—Net Investment Income”);
- \$24 million of lower operating expenses (see “—Operating Expenses”); partially offset by
- \$88 million of higher dividend expense to policyholders mainly due to the increase in New York Life’s dividend scale approved by the Board of Directors in November 2013; and
- \$62 million decrease in income from New York Life owned Corporate Owned Life Insurance policies (no tax effect) driven by declining market performance.

Premium Income

Premiums are generated from sales of life and health insurance and annuities. In addition, sales of Guaranteed Products (“**GP**”), included within Institutional Annuities, and Retirement Plan Services (“**RPS**”) that include annuity purchase rate guarantees, are counted as premium income since there is exposure to mortality risk in these products.

The following table shows premium income by business operation for the nine months ended September 30, 2014 and 2013 (\$ in millions):

	September 30,		Change	
	2014	2013	\$	%
Individual Life.....	\$ 4,785	\$ 4,683	\$ 102	2.2%
Direct Operations	1,021	995	26	2.6
Group Membership Association (“GMAD”)	394	489	(95)	(19.4)
Long Term Care (“LTC”) and Disability Income.....	183	172	11	6.4
Insurance and Agency Group	6,383	6,339	44	0.7
Institutional Annuities	1,696	1,192	504	42.3
RPS.....	1,897	1,894	3	0.2
Investments Group	3,593	3,086	507	16.4
Total.....	\$ 9,976	\$ 9,425	\$ 551	5.8%

Insurance and Agency Group premiums for the nine months ended September 30, 2014 increased \$44 million from the same period last year, primarily driven by higher single and renewal premiums from Individual Life and Direct Operations business. Partially offsetting this increase are lower renewal premiums from GMAD reflecting New York Life’s decision to not renew any Major Medical health business in 2014.

Premiums from the Investments Group for the nine months ended September 30, 2014 increased \$507 million from the same period last year, primarily attributable to Institutional Annuities’ GP. The increase in GP was mainly driven by higher Guaranteed Investment Contract (“GIC”) sales during the first nine months of 2014, partially offset by a decrease in premium income as a result of the lower contribution New York Life made to its qualified defined benefit pension plans in 2014 (\$76 million in 2014 as compared to \$246 million in 2013)¹.

Net Investment Income

Net investment income for the nine months ended September 30, 2014 was \$3,868 million, an increase of \$169 million, or 4.6%, from the \$3,699 million reported for the nine months ended September 30, 2013. While income from fixed income investments is slightly improving, the growth in net investment income is primarily driven by higher distribution income on limited partnerships.

Benefit Payments

Benefit payments include death benefits, annuity benefits, accident and health benefits, surrender benefits (including scheduled maturities and withdrawals on GP (primarily GICs) and RPS) and interest on policy claims and deposit funds.

¹ New York Life has established tax-qualified defined benefit pension plans to cover eligible employees and agents. The plans are solely funded by contributions from New York Life and the assets of these plans are held in separate trusts. The trusts invest the contributions they receive in general and separate account contracts issued by New York Life (including Immediate Participation Guarantee (“IPG”) contracts issued by the general account).

The following table shows benefit payments by business operation for the nine months ended September 30, 2014 and 2013 (\$ in millions):

	September 30,		Change	
	2014	2013	\$	%
Individual Life.....	\$ 3,665	\$ 3,667	\$ (2)	nm%
Direct Operations	566	517	49	9.5
GMAD.....	223	350	(127)	(36.3)
LTC and Disability Income	59	53	6	11.3
Insurance and Agency Group	4,513	4,587	(74)	1.6
Institutional Annuities	2,165	1,724	441	25.6
RPS.....	1,692	1,720	(28)	(1.6)
Retail Annuities ¹	92	101	(9)	(8.9)
Investments Group	3,949	3,545	404	11.4
Total	\$ 8,462	\$ 8,132	\$ 330	4.1%

nm = not meaningful

¹ Retail Annuities are no longer sold through New York Life.

The decrease in the Insurance and Agency Group benefit payments was primarily driven by lower GMAD health benefits, which was mainly a result of New York Life exiting the Major Medical health business, effective January 1, 2014.

The increase in the Investments Group benefit payments was primarily driven by higher GP surrender benefits of \$463 million mainly due to an increase in scheduled GIC maturities during the first nine months of the year.

Additions to Reserves

The following table shows additions to reserves by business operation for the nine months ended September 30, 2014 and 2013 (\$ in millions):

	September 30,		Change	
	2014	2013	\$	%
Individual Life.....	\$ 1,448	\$ 1,357	\$ 91	6.7%
LTC and Disability Income	195	172	23	13.4
Direct Operations	123	166	(43)	(25.9)
GMAD.....	12	(16)	28	nm
Insurance and Agency Group	1,778	1,679	99	5.9
RPS.....	591	520	71	13.7
Institutional Annuities	321	365	(44)	(12.1)
Retail Annuities ¹	(55)	(59)	4	6.8
Investments Group	857	826	31	3.8
Total	\$ 2,635	\$ 2,505	\$ 130	5.2%

nm = not meaningful

¹ Retail Annuities are no longer sold through New York Life.

The increase in the Insurance and Agency Group additions to reserves was primarily driven by Individual Life, largely reflecting the aging of the insurance inforce including the receipt of renewal premiums.

The increase in the Investments Group additions to reserves was primarily driven by a higher increase in reserves associated with RPS, mainly due to an increase in Guaranteed Interest Account (“GIA”) net contributions for the nine months ended September 30, 2014. Partially offsetting this increase was a decrease in Institutional Annuities’ GP reserves, mainly due to a decline in reserves as a result of the lower issuance of IPG contracts to New York Life’s qualified defined benefit pension plans, which was partially offset by an increase in GIC reserves due to higher sales (which more than offset the higher GIC maturities) during the first nine months of 2014.

Net Transfers from Separate Accounts

Net transfers from separate accounts for the nine months ended September 30, 2014 were \$360 million, a decrease of \$41 million from the \$401 million transferred from separate accounts for the nine months ended September 30, 2013. The \$41 million decrease was primarily due to a decline in scheduled maturities.

Operating Expenses

Operating expenses primarily include general insurance expenses, taxes, licenses, fees and commissions. For the nine months ended September 30, 2014, total operating expenses of \$1,855 million reflected a decrease of \$24 million, or 1.3%, from the \$1,879 million reported for the nine months ended September 30, 2013. The decrease was mainly driven by lower postretirement benefits costs primarily due to the impact of discount rates used at the December 31, 2013 measurement date, partially offset by an increase due to several new business and infrastructure initiatives.

Dividends to Policyholders

Based on the dividend scale approved by the Board of Directors in November 2013, which primarily factors in investment experience (interest earnings, credit loss experience and equity returns), mortality results and expense levels that develop over a period of time, the pre-tax expense recorded for dividends to policyholders for the nine months ended September 30, 2014 was \$1,148 million, which was \$88 million, or 8.3%, higher than the \$1,060 million reported for the nine months ended September 30, 2013.

Federal Income Taxes

The following table reconciles the tax expense calculated at the statutory rate to the tax expense reflected in results of operations:

Tax Reconciliation

	For the nine months ended September 30,			Change	
	2014	2013	(in millions)		
Pre-tax gain from operations at 35%	\$ 191	\$ 158	\$ 33		
Tax credits ¹	(106)	(95)	(11)		
Tax exempt income	(44)	(66)	22		
Excess of tax over book loss on limited partnerships.....	(13)	25	(38)		
Non-deductible pension and postretirement benefits costs ...	56	73	(17)		
Other.....	10	19	(9)		
Subtotal before pension contribution	94	114		(20)	
Pension contribution credit.....	(17)	(86)	69		
Total federal income tax expense	\$ 77	\$ 28		\$ 49	

¹ Tax credits result primarily from investments in low income housing and alternative energy.

Net Realized Capital Gains/(Losses)

Net realized capital losses after taxes and transfers to the IMR were \$39 million for the nine months ended September 30, 2014, a decline of \$115 million from the net realized capital gains of \$76 million reported for the nine months ended September 30, 2013.

The following table represents the net realized capital gains/(losses) for the nine months ended September 30, 2014 and 2013.

Net Realized Capital Gains/(Losses)

	For the nine months ended September 30,		Change
	2014	2013	
	(in millions)		
Bonds	\$ 226	\$ 114	\$ 112
Unaffiliated common stock	120	137	(17)
Derivatives	10	(30)	40
Other ¹	<u>7</u>	<u>66</u>	<u>(59)</u>
Total before capital gains tax and other-than-temporary impairments (“OTTI”)	363	287	76
OTTI	(148)	(66)	(82)
Capital gains tax expense ²	<u>(135)</u>	<u>(94)</u>	<u>(41)</u>
Net realized capital gains after tax and before transfers to the IMR	80	127	(47)
Realized capital gains transferred to the IMR ³	<u>(119)</u>	<u>(51)</u>	<u>(68)</u>
Net realized capital gains/(losses) after tax and transfers to the IMR	<u>\$ (39)</u>	<u>\$ 76</u>	<u>\$ (115)</u>

¹ For the nine months ended September 30, 2013, primarily represents realized foreign exchange gains on Global Medium Term Note contracts of \$59 million. These gains were substantially offset by realized losses on currency swaps included in Derivatives.

² OTTI losses are generally not subject to current tax treatment; however, current year tax includes benefits on current year OTTI on residential mortgage-backed securities and sales of other securities impaired in prior years.

³ Capital gains tax expense transferred to the IMR was \$64 million and \$27 million for the nine months ended September 30, 2014 and 2013, respectively.

The following table shows the distribution of OTTI and the year-over-year change in OTTI by asset type:

Other-Than-Temporary Impairments

	For the nine months ended September 30,		Change
	2014	2013	
	(in millions)

Unaudited Financial Position – At September 30, 2014 Compared to December 31, 2013

Assets

Total assets at September 30, 2014 were \$143,501 million, which was \$4,303 million, or 3.1%, higher than the \$139,198 million reported at December 31, 2013. The increase primarily reflected:

- \$4,125 million higher cash and invested assets, primarily due to the investment of operating cashflow and unrealized gains on affiliated entities (see “—Surplus” for further details); and
- \$262 million increase in uncollected premiums, which are generally due in the fourth quarter.

Liabilities

Total liabilities, including the asset valuation reserve (“AVR”), at September 30, 2014 were \$124,322 million, which was \$2,978 million, or 2.5%, higher than the \$121,344 million reported at December 31, 2013. The increase was primarily driven by higher policyholder liabilities (policy reserves, deposit funds and policy claims) of \$3,179 million (see “—Unaudited Results of Operations—For the nine months ended September 30, 2014 Compared to the nine months ended September 30, 2013—Additions to Reserves” on page 3 for details).

Surplus

Surplus was \$19,179 million at September 30, 2014, an increase of \$1,325 million, or 7.4%, from the \$17,854 million reported at December 31, 2013. The main drivers of the change in surplus are presented in the following table:

Surplus and AVR

	September 30, 2014
	(in millions)
Beginning surplus	\$ 17,854
Net income	429
Net unrealized capital gains ¹	1,068
Pension and postretirement benefits impacts	99
Correction of error	48
Change in deferred taxes	2
Change in nonadmitted assets ²	(139)
Change in AVR	<u>(182)</u>
Ending surplus	19,179
AVR	2,600
Surplus and AVR³	\$ 21,779

¹ Excludes deferred capital gains tax expense on net unrealized gains of \$22 million reclassified to “Change in deferred taxes.”

² Excludes the increase in nonadmitted deferred income taxes of \$103 million reclassified to “Change in deferred taxes.”

³ Consolidated surplus and AVR, which includes the AVR of New York Life’s wholly owned U.S. insurance subsidiaries (New York Life Insurance and Annuity Corporation (“NYLIAC”) and NYLIFE Insurance Company of Arizona (“NYLAZ”)), totaled \$22,711 million at September 30, 2014.

Net income accounted for \$429 million of the change in surplus during the first nine months of 2014. See “—Unaudited Results of Operations—For the nine months ended September 30, 2014 Compared to the nine months ended September 30, 2013—Net Income.” Other items impacting the 2014 surplus position included the following:

Net Unrealized Capital Gains

Net unrealized capital gains resulted in an increase in surplus of \$1,068 million at September 30, 2014. The increase was primarily due to \$981 million of unrealized gains on affiliated entities primarily attributable to:

- NYLIAC – \$665 million increase resulting from positive operating results primarily driven by investment and mortality spread income;
- NYL Investments – a net \$233 million increase resulting from positive operating results primarily driven by higher assets under management due to strong market performance and net flows (gross sales and other deposits, net of redemptions and other withdrawals); and
- New York Life Enterprises – a net \$82 million increase primarily due to unrealized gains experienced on foreign denominated fixed maturity investments, which were mostly driven by a decline in interest rates in Mexico, partially offset by foreign exchange losses resulting from the weakening of the Mexican Peso.

Adding to the increase was \$87 million in other net unrealized gains from investments, mainly driven by:

- Derivative gains of \$158 million, primarily relating to mark to market adjustments of \$218 million on interest rate swaps used to manage the duration of New York Life’s investment portfolio as long-term interest rates declined and \$71 million of gains on hedges of foreign denominated assets as the U.S. dollar strengthened against most major currencies during the year. These unrealized gains were partially offset by \$91 million of losses on hedges used to protect New York Life’s capital from a spike in interest rates and \$25 million of losses on inflation swaps used to hedge the inflation risk associated with certain LTC policies; and
- Unrealized gains on limited partnerships of \$71 million (these gains largely represent the recording of current year earnings upon receipt of the limited partnership financial statements and unrealized losses reclassified to OTTI); partially offset by
- Net unrealized foreign exchange losses on bonds and unaffiliated equity investments of \$60 million and \$46 million, respectively, primarily resulting from various currencies weakening against the U.S. dollar.

Pension and Postretirement Benefits Impacts

Pension and postretirement benefits related impacts of \$99 million are due to the reclassification of previously recorded liabilities to net gain. Statutory accounting principles require that certain asset and liability changes be charged against surplus immediately, before the expense is incurred. When the expense is charged through net gain from operations, there is an offsetting benefit to negate the earnings reduction to surplus.

The calculation of pension and other postretirement benefits obligations requires management to select demographic and economic assumptions that affect the reported amounts of assets and liabilities at

year end. Assumptions include, but are not limited to, interest rates, return on plan assets, mortality, withdrawal and retirement rates, and healthcare cost trend. The selected actuarial assumptions comply with the National Association of Insurance Commissioners (“NAIC”) guidance, which requires the Company to use its best estimate for each assumption, and are reviewed regularly for reasonability, comparing assumed results to actual plan experience with adjustments made when necessary. New York Life uses a December 31st measurement date, as required. Impacts of actual plan experience during the year and any change in assumptions will be reflected in the fourth quarter and could have a significant impact on New York Life’s surplus.

Correction of Error

In connection with the audit of prior year tax returns, New York Life effectively settled a tax position which resulted in a \$48 million benefit to surplus. The 2013 statutory financial statements should have reflected the benefit of this settlement. To correct this error, New York Life has reduced current income taxes payable by \$48 million and has recorded a prior period correction that increased statutory surplus by the same amount.

Change in Deferred Taxes

The net positive impact on surplus of the change in deferred taxes was \$2 million at September 30, 2014. The following table details the components of the change in deferred taxes:

	September 30, 2014
	(in millions)
Deferred income tax benefit on operating results.....	\$ 127
Deferred capital gains tax expense on change in net unrealized capital gains	(22)
Subtotal.....	105
Increase in deferred income taxes nonadmitted.....	(103)
Total change in deferred taxes	\$ 2

Change in Nonadmitted Assets

Certain assets are not allowed as admitted assets under statutory accounting principles. Generally these are assets with economic value, but which cannot be readily used to pay policyholder obligations. A net increase in nonadmitted assets during 2014 resulted in a decrease to surplus of \$139 million during the nine months ended September 30, 2014, primarily due to higher prepaid expenses and software consulting fees.

Change in AVR

The AVR is an investment reserve established to provide for default risk on fixed income assets and market value fluctuation on equity-type investments. At September 30, 2014, the AVR increased \$182 million and consisted of a \$139 million increase to the equity component (primarily common stock and invested assets), mainly driven by higher common stocks, and a \$43 million increase to the default component (primarily bonds and mortgage loans) as required under the NAIC’s AVR formula.

Liquidity Sources and Requirements

Liquidity Sources

New York Life's principal cash inflows from its insurance activities are derived from life insurance premiums, annuity considerations, GICs and deposit funds. New York Life's principal cash inflows from investments result from proceeds on sales, repayments of principal, maturities of invested assets and investment income. The following table sets forth the total available liquidity of New York Life from liquid assets and other funding sources at the end of the specified periods.

New York Life's Available Liquidity at Market Value

	September 30, 2014	December 31, 2013	December 31, 2012
	(in millions)		
Cash and Short-Term Investments:			
Cash and Cash Equivalents	\$ 832	\$ 1,124	\$ 1,577
Short-Term Investments ¹	1,252	1,770	1,284
Less: Securities Lending, Outstanding Commercial Paper and Other Short-Term Liabilities	(1,473)	(1,628)	(1,652)
Net Cash and Short-Term Investments	611	1,266	1,209
Bonds:			
U.S. Government and Agency Bonds	7,946	8,325	9,009
Public Corporate Investment-Grade Bonds & Collateralized Mortgage Obligations ("CMOs") ²	38,482	33,089	35,156
Liquid Bonds	46,428	41,414	44,165
Equities:			
Public Equities Portfolio	1,977	2,157	1,941

Other Funding Sources:			
Bank Facility/Commercial Paper capacity	2,000	2,000	2,000
Federal Home Loan Bank available capacity ³	5,022	4,723	4,875
Total Other Funding Sources	7,022	6,723	6,875
Total Available Liquidity	\$ 56,038	\$ 51,560	\$ 54,190

¹ Includes New York Life Short Term Fund ("NYL STIF") of \$935 million, \$1,515 million and \$1,182 million at September 30, 2014, December 31, 2013 and 2012, respectively, which is included in Limited Partnerships and Other Investments within Assets.

² Includes all Public Corporate Investment-Grade Bonds and CMO's regardless if they are carried above or below market value.

³ Available capacity represents 5% of New York Life's total admitted assets, less secured borrowing. At September 30, 2014, New York Life's borrowing capacity with the Federal Home Loan Bank was \$6,623 million of which \$1,601 million had been used.

New York Life's U.S. insurance subsidiaries (NYLIAC and NYLAZ) are subject to certain insurance department regulatory restrictions as to the payment of dividends to New York Life. In general, a dividend may be paid without prior approval from the domiciliary state insurance department provided that the subsidiary's statutory earned surplus is positive. In addition, dividends paid in any twelve month period cannot exceed the greater of (i) 10% of the subsidiary's surplus, or (ii) the subsidiary's net gain from operations, each based on the preceding December 31st statutory financial statements, without

regulatory approval. These restrictions pose no short-term or long-term liquidity concerns for New York Life, as it does not rely on subsidiary dividends as a primary source of liquidity.

Liquidity Uses

New York Life's principal cash outflows primarily relate to the payment of liabilities associated with its various life insurance, annuity and group pension products, GICs and funding agreements, operating expenses and income taxes. Liabilities arising from New York Life's insurance activities primarily relate to benefit payments, policy surrenders, maturities and withdrawals from GICs and funding agreements, and loans and dividends to policyholders.

A primary liquidity concern with respect to life insurance and annuity products is the risk of early policyholder and contractholder withdrawals. New York Life includes provisions in certain of its contracts that are designed to limit withdrawals from general account institutional pension products (group annuities, GICs and certain deposit fund liabilities) sold to employee benefit plan sponsors. Such provisions include surrender charges, market value adjustments and prohibitions or restrictions on withdrawals. New York Life closely monitors its liquidity requirements in order to match cash inflows with expected cash outflows, and employs an asset/liability management approach tailored to the specific requirements of each product line based upon the return objectives, risk tolerance, liquidity, tax and regulatory requirements of the underlying products. It also regularly conducts liquidity stress tests and monitors early warning indicators of potential liquidity issues.

New York Life participates in a securities lending program for its general account whereby fixed income securities are loaned to third parties, primarily major brokerage firms and commercial banks. The borrowers of its securities provide New York Life with collateral, typically in cash. New York Life separately manages this collateral and invests such cash collateral in other securities, primarily U.S. Treasuries, U.S. government agency securities, mortgage-backed securities and highly rated corporate fixed income securities with short maturities. Securities on loan under the program could be returned to New York Life by the borrowers, or New York Life could call such securities at any time. Returns of loaned securities would require New York Life to return the cash collateral associated with such loaned securities. New York Life was liable for cash collateral under its control of \$552 million at September 30, 2014. New York Life was liable for cash collateral under its control of \$437 million and \$512 million at December 31, 2013 and 2012, respectively.

New York Life is committed to maintaining adequate capitalization for its insurance and non-insurance subsidiaries to fund growth opportunities and support new products, and, with respect to its U.S. insurance subsidiaries, to maintain targeted Risk Based Capital ("RBC") levels. In addition, New York Life may make loans to its affiliates, to provide additional funds to meet the business needs of these entities. New York Life made capital contributions of \$263 million to its non-insurance subsidiaries during the nine months ended September 30, 2014. New York Life received returns of capital of \$156 million from its non-insurance subsidiaries during the nine months ended September 30, 2014. New York Life made capital contributions of \$26 million to its non-insurance subsidiaries during each of the years ended December 31, 2013 and 2012, respectively. New York Life received a return of capital of \$140 million from NYLÉ during the year ended December 31, 2013.

CERTAIN FINANCIAL AND ACCOUNTING MATTERS

Accounting Policies and Principles

Statutory Accounting Practices

The financial statements of New York Life have been prepared on the basis of NAIC Statutory Accounting Principles (“**NAIC SAP**”) prescribed or permitted by the New York State Department of Financial Services (“**NYSDFS**”). NAIC SAP differs from accounting practices generally accepted in the United States (“**U.S. GAAP**”) in that NAIC SAP is primarily designed to reflect the ability of the insurer to satisfy its obligations to policyholders, contractholders and beneficiaries, whereas under U.S. GAAP, revenues and expenses are recorded in financial reporting periods to match revenues and expenses and reflect the ongoing financial results of the insurer. For example, under NAIC SAP, commissions and other costs incurred in connection with acquiring new business are charged to operations in the year incurred; whereas under U.S. GAAP, expenses are accrued on a basis to match them against appropriate revenues.

Under NAIC SAP, New York Life’s financial statements are not consolidated and investments in subsidiaries are generally shown at net equity value. Accordingly, the assets, liabilities and results of operations of New York Life’s subsidiaries are not consolidated with the assets, liabilities and results of operations, respectively, of New York Life. However, New York Life’s financial statements do reflect, in New York Life’s assets, the net equity value of New York Life’s subsidiaries and, in New York Life’s surplus, the current year change in net equity value, less dividends paid and contributions from New York Life, of subsidiaries as an unrealized gain or loss on investments. Dividends paid by subsidiaries to New York Life are included in New York Life’s net investment income.

Discussion of Certain Differences between NAIC SAP and U.S. GAAP

The financial information of New York Life is presented in accordance with NAIC SAP. Statutory accounting is used by state insurance regulators to monitor the operations of insurance companies. Financial statements prepared under NAIC SAP as determined under New York State Insurance Law vary from those prepared under U.S. GAAP in certain material respects, primarily as follows:

- non-public majority owned subsidiaries are generally carried at net equity value with earnings of such subsidiaries recognized in net investment income only when dividends are declared, whereas under U.S. GAAP, subsidiary earnings would be consolidated with net income and recognized when earned, and dividends from such subsidiaries would be eliminated in consolidation;
- the costs related to acquiring business, principally commissions, certain policy issue expenses and sales inducements, are charged to income in the year incurred, whereas under U.S. GAAP, these costs would be deferred for successful sales and amortized over the periods benefited;
- life insurance reserves are based on different assumptions than they are under U.S. GAAP and dividends on participating policies are recognized for the full year when approved by the board of directors of New York Life (the “**Board of Directors**”), whereas under U.S. GAAP, they would be accrued when earned by policyholders;
- life insurance companies are required to establish asset valuation reserves by a direct charge to surplus to offset potential investment losses, whereas under U.S. GAAP, no AVR would be recognized;

- investments in bonds are generally carried at amortized cost or values as prescribed by the NYSDFS, whereas under U.S. GAAP, investments in bonds that are classified as available for sale or trading would be carried at fair value, with changes in fair value of bonds classified as available for sale reflected in equity, and changes in fair value of bonds classified as trading reflected in earnings;
- realized gains and losses resulting from changes in interest rates on fixed income investments are deferred in the IMR and amortized into investment income over the remaining life of the investment sold, whereas under U.S. GAAP, the gains and losses would be recognized in income at the time of sale;
- deferred income taxes exclude state income taxes and are admitted to the extent they can be realized within three years subject to a 15% limitation of capital and surplus with changes in the net deferred tax reflected as a component of surplus, whereas under U.S. GAAP, deferred income taxes include federal and state income taxes, and changes in the deferred tax are reflected in either earnings or other comprehensive income;
- a tax loss contingency is required to be established if it is more likely than not that a tax position will not be sustained upon examination by taxing authorities. If a loss contingency is greater than 50 percent of the tax benefit associated with a tax position, the loss contingency is increased to 100 percent, whereas under U.S. GAAP the amount of the benefit for any uncertain tax position would be the largest amount that is greater than 50 percent likely of being realized upon settlement;
- certain reinsurance transactions are accounted for using deposit accounting and assets and liabilities are reported net of reinsurance, whereas under U.S. GAAP, these transactions qualify for reinsurance accounting, and assets and liabilities would be reported gross of reinsurance;
- certain assets, such as intangible assets, furniture and equipment, deferred taxes that are not realizable within three years and unsecured receivables are considered nonadmitted and excluded from assets, whereas they would be included under U.S. GAAP subject to a valuation allowance, as appropriate;
- contracts that have any mortality and morbidity risk, regardless of significance, and contracts with life contingent annuity purchase rate guarantees are classified as insurance contracts, whereas under U.S. GAAP, contracts that do not subject New York Life to significant risks arising from policyholder mortality or morbidity would be accounted for in a manner consistent with the accounting for interest bearing or other financial instruments;
- goodwill held in an insurance company is admitted subject to a 10% limitation on surplus and amortized over the useful life of the goodwill, not to exceed 10 years, and goodwill held by non-insurance subsidiaries is assessed in accordance with U.S. GAAP, subject to certain limitations for holding companies and foreign insurance subsidiaries, whereas under U.S. GAAP, goodwill, which is considered to have an indefinite useful life, is tested for impairment and losses are recorded, only when goodwill is deemed impaired;
- fair value is required to be used in the determination of the expected return on the plan assets component of the net periodic benefit cost of pension and other postretirement obligations, whereas under U.S. GAAP, the market-related value of plan assets would be used. The market-related value of plan assets recognizes changes in the fair value of plan assets over a five year period;

- the adoption of new NAIC SAP guidance for pension and other postretirement benefit plans effective January 1, 2013, has resulted in two temporary differences: (i) while the recognition of funded status is the same as U.S. GAAP as of January 1, 2013, the transition from the accrued liability for other postretirement benefits will be phased-in over a period not to exceed 10 years, and (ii) the additional liability recognized as of January 1, 2013, related to non-vested participants, will be amortized into net periodic benefit cost over the remaining future service to vesting date;
- surplus notes are included as a component of surplus, whereas under U.S. GAAP, they would be presented as a liability;
- U.S. GAAP requires that for certain reinsurance arrangements, whereby assets are retained by the ceding insurer (such as funds withheld or modified coinsurance) and a return is paid based on the performance of underlying investments, then the liabilities for these reinsurance arrangements must be adjusted to reflect the fair value of the invested assets; NAIC SAP does not contain a similar requirement;
- all other-than-temporarily impaired corporate securities are written down to fair value, whereas under U.S. GAAP, if certain conditions are met, credit impairments on corporate securities are recorded based on the net present value of future cash flows expected to be collected, discounted at the current book yield. Also, if certain conditions are met, the non-credit portion of OTTI on a loan-backed or structured security is not recognized under NAIC SAP; whereas under U.S. GAAP, if certain conditions are met, the non-credit portion of OTTI on a debt security is recorded through other comprehensive income. A non-credit loss exists when the fair value of a security is less than the present value of projected future cash flows expected to be collected;
- undistributed income and capital gains and losses for limited partnerships and limited liability companies are reported in surplus as unrealized gains or losses, whereas under U.S. GAAP, in many cases, i.e. under specialized accounting treatment for investment companies, unrealized gains and losses would be included in net income;
- contracts that contain an embedded derivative are not bifurcated between components and are accounted for consistent with the host contract, whereas under U.S. GAAP either the contract would be recorded at fair value with changes in the fair value included in earnings or the embedded derivative would need to be bifurcated from the host contract and accounted for separately;
- certain derivative instruments are carried at amortized cost, whereas under U.S. GAAP, all derivative instruments would be carried at fair value; and
- changes in the fair value of derivative financial instruments not carried at amortized cost are recorded as unrealized capital gains or losses and reported as changes in surplus, whereas under U.S. GAAP, these changes would generally be reported through earnings unless they qualify and are designated for cash flow or net investment hedge accounting.

The effects on the financial statements of the variances between NAIC SAP and U.S. GAAP are material to New York Life.

Adjustments for Impaired Investments

The cost basis of bonds and equity securities are adjusted for impairments in value deemed to be other-than-temporary, with the associated realized loss reported in net income. The cost basis of limited partnerships is adjusted for impairments in value deemed to be other than temporary, with the difference between cost and carrying value (which approximates fair value) recognized as a realized loss reported in net income. The new cost basis of an impaired limited partnership is not adjusted for subsequent increases in the underlying audited equity of the investee.

Statutory Investment Reserves

NAIC SAP requires a life insurance company to maintain both an AVR and an IMR to absorb both realized and unrealized gains and losses on a portion of its investments. The AVR is an investment reserve established to provide for default risk on fixed income assets and market value fluctuation on equity-type investments. The amount of the AVR is determined by formula, which considers the type of investment, the credit rating (where applicable) and current year changes in realized and unrealized capital gains and losses (other than those resulting from changes in interest rates). Under NAIC SAP, this reserve is included in total adjusted capital (“TAC”) for RBC purposes. Changes in the AVR are accounted for as direct increases or decreases in surplus.

The IMR applies to all types of fixed maturity securities, including bonds, preferred stocks, mortgage-backed securities, asset-backed securities and mortgage loans. The IMR is designed to capture the after-tax capital gains or losses which are realized upon the sale of such investments and which result from changes in the overall level of interest rates. The captured after-tax net realized gains or losses are then amortized into income over the remaining period to the stated maturity of the investment sold. The IMR is not treated under NAIC SAP as part of total adjusted capital for RBC purposes. New York Life’s IMR was \$485 million at September 30, 2014.

Dividends

New York Life annually determines the amount of dividends payable to eligible policyholders. These dividends have the effect of reducing the cost of insurance to policyholders and should be distinguished from the dividends paid on shares of capital stock by other types of business corporations or by stock life insurance companies. Policies on which such dividends may be payable are referred to as participating policies; policies on which such dividends are not payable are referred to as non-participating policies.

Annually, the Board of Directors approves the divisible surplus of New York Life, which is paid out to eligible policyholders in accordance with an actuarially determined dividend scale. New York Life has discretion, subject to statutory requirements as to the source of dividends, to vary the amount of dividends payable to policyholders, even many years after the issuance of a particular policy. In determining the policyholder dividends payable in any year, the Board of Directors considers, among other things, the amounts necessary to meet New York Life’s future policy obligations, maintain reserves and operate the business. To the extent authorized by New York Life’s Board of Directors, New York Life has the right to continue to declare policyholder dividends and to make dividend payments on its participating policies. These dividends are paid out of surplus.

Policy Reserves

Life insurance companies price their insurance products based upon assumptions regarding certain future events, including investment income, expenses incurred and use of mortality and morbidity tables. NAIC SAP prescribes methods for providing for future benefits to be paid on a conservative basis, primarily by charging current operations with amounts necessary to establish appropriate reserves for anticipated future claims. Thus, under applicable state law, New York Life must maintain reserves in amounts which are actuarially calculated to be sufficient to meet its various policy and contract obligations as they become due. Such reserves appear as liabilities on New York Life's financial statements.

New York Life is required under the New York Insurance Law to conduct annually an analysis of the sufficiency of all life insurance and annuity statutory reserves.

Reinsurance

New York Life uses a variety of reinsurance agreements with insurers to control its loss exposure. Generally, these agreements are structured either on an automatic basis, where all risks meeting prescribed criteria are automatically covered, or on a facultative basis, where the reinsurer must accept the specific reinsurance risk before the reinsurer becomes liable on that risk. The amount of each risk retained by New York Life on a facultative basis depends on its evaluation of the specific risk, its maximum retention limits and the amount of reinsurance available.

Under the terms of the reinsurance agreements, the reinsurers will be liable to reimburse New York Life for the ceded amount in the event a claim on a reinsured policy is paid. New York Life remains primarily liable for all claims payable on reinsured policies, even if the reinsurer fails to meet its obligations under the reinsurance agreement. New York Life routinely collects amounts due from its reinsurers on a timely basis.

Separate Accounts

Under state insurance laws, insurers are permitted to establish separate investment accounts in which assets backing certain policies, including certain group annuity contracts, are held. The investments in each separate account (which may be pooled or customer specific) are maintained separately from those in other separate accounts and the general account. Generally, the investment results of the separate account assets pass through to separate account policyholders and contractholders, so that an insurer derives management and other fees from, but bears no investment risk on these assets. In separate accounts for products with minimum interest rate or benchmark guarantees, the risk that the investment results of the separate account assets will not meet the minimum rate guaranteed on these products is borne by the insurer. Under the terms of the contracts of certain guaranteed separate accounts, New York Life will share in the excess investment performance of the separate account over an established benchmark.

STATUTORY CAPITALIZATION OF NEW YORK LIFE

New York Life is a mutual insurance company incorporated under the laws of the State of New York, United States. New York Life was incorporated on May 21, 1841 under the name Nautilus Insurance Company, was licensed to transact business in the State of New York on April 17, 1845 and changed its name to New York Life Insurance Company on April 5, 1849. The U.S. federal employer identification number of New York Life is 13-5582869. The registered office of New York Life is 51 Madison Avenue New York, New York 10010. The telephone number of New York Life is +1 (800) 692-3086.

As a mutual company, New York Life has no capital stock and no shareholders. New York Life's participating policyholders generally have certain rights to receive policy dividends, and they and certain other policyholders may have rights to receive distributions in a proceeding for its rehabilitation, liquidation or dissolution. Policyholders also have certain rights to vote in the election of directors as provided by New York State law.

New York Life's balance sheet includes its surplus and an AVR. The amount by which the admitted assets of New York Life exceed its liabilities is referred to as surplus. The AVR stabilizes surplus from fluctuations in the value of the investment portfolio (other than fluctuations in the value of certain fixed income investments due to interest rate changes) of New York Life.

The following table sets forth debt and the capitalization of New York Life at September 30, 2014. The AVR is included in the following table even though such reserve is shown as a liability on New York Life's balance sheet. This treatment is consistent with the general view of the insurance industry. In addition, such reserve is included as part of TAC for RBC purposes.

SELECTED HISTORICAL STATUTORY FINANCIAL INFORMATION OF NEW YORK LIFE

The table presented below sets forth selected financial information for New York Life. Prospective investors should read it in conjunction with “Certain Financial and Accounting Matters”, “Summary of Certain Third Quarter Financial Information” and New York Life’s financial statements. The selected financial information for New York Life at and for each of the years ended December 31, 2013, 2012, and 2011 has been derived from the annual audited statutory financial statements. The selected financial information for New York Life at and for the nine months ended September 30, 2014 and 2013 has been derived from the quarterly unaudited statutory financial statements.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements. Actual results may differ from estimates. Historical results are not necessarily indicative of results for any future period.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

- A.** The accompanying financial statements of New York Life Insurance Company ("the Company") have been prepared using accounting practices prescribed by the New York State Department of Financial Services ("NYSDFS").

The NYSDFS recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial position and results of operations of an insurance company and for determining its solvency under New York State Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP") has been adopted as a component of prescribed practices by the State of New York. Prescribed statutory accounting practices include state laws and regulations. Permitted statutory accounting practices encompass accounting practices that are not prescribed; such practices differ from state to state, may differ from company to company within a state, and may change in the future. The Company has no permitted practices.

A reconciliation of the Company's net income at September 30, 2014 and December 31, 2013 between NAIC SAP and practices prescribed by the state of New York is shown below:

	September 30, 2014	December 31, 2013
Statutory Net Income, New York basis	\$ 429,455,699	\$ 520,323,538
State Prescribed Practices:		
1. NYSDFS Circular Letter No. 11 (2010) impact on deferred premiums*	(1,184,516)	2,254,312
2. NYSDFS Seventh Amendment to Regulation No. 172 admitted unearned reinsurance premium**	<u>848,100</u>	<u>(1,382,202)</u>
Statutory Net Income, NAIC SAP	<u>\$ 429,119,283</u>	<u>\$ 521,195,648</u>

A reconciliation of the Company's surplus at September 30, 2014 and December 31, 2013 between NAIC SAP and practices prescribed by the State of New York is shown below:

	September 30, 2014	December 31, 2013
Statutory Surplus, New York basis	\$ 19,179,400,948	\$ 17,853,770,064
State Prescribed Practices:		
1. NYSDFS Circular Letter No. 11 (2010) impact on deferred premiums*	100,710,642	101,895,158
2. NYSDFS Seventh Amendment to Regulation No. 172 admitted unearned reinsurance premium**	<u>(39,918,946)</u>	<u>(40,467,046)</u>
Statutory Surplus, NAIC SAP	<u>\$ 19,240,192,644</u>	<u>\$ 17,915,198,176</u>

* NYSDFS Circular Letter No. 11 (2010) clarified the accounting for deferred premium assets when reinsurance is involved.

** NYSDFS Regulation No. 172 was amended to allow for the admission of an unearned reinsurance premium asset.

- B.** No change.

- C.** (1) - (13) No change.

2. Accounting Changes and Correction of Errors

Prior Period Correction

In connection with the audit of prior year tax returns, the Company effectively settled a tax position which resulted in a \$48,499,214 benefit to surplus. Therefore, the 2013 statutory financial statements should have reflected the benefit of this settlement. To correct this error, the Company has reduced current income taxes payable by \$48,499,214 and has recorded a prior period correction that increased statutory surplus by the same amount in 2014.

3. Business Combinations and Goodwill

Not applicable.

4. Discontinued Operations

Not applicable.

5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

No change.

B. Debt Restructuring

No change.

C. Reverse Mortgages

The Company does not have any reverse mortgages.

NOTES TO FINANCIAL STATEMENTS

D. Loan-Backed Securities

- (1) Prepayment assumptions for mortgage-backed/loan-backed and structured securities were obtained from external sources such as Bloomberg, Intex and Blackrock Solutions.
- (2) The Company did not have any loan-backed and structured securities which are other-than-temporarily impaired where the Company intends to sell, or does not have the intent and ability to hold until recovery.
- (3) The following table lists each security at a CUSIP level where the present value of cash flows expected to be collected is less than the amortized cost basis during the current period.

⁽¹⁾ Only the impaired lots within each CUSIP are included within this table.

- (4) The following table presents the Company's gross unrealized losses and fair values for loan-backed and structured securities, aggregated by the length of time that the individual securities have been in a continuous unrealized loss position as of September 30, 2014:

	September 30, 2014					
	Less than 12 months		12 months or greater		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
General Account	\$ 1,856,140,964	\$ 21,512,394	\$ 2,487,764,614	\$ 188,021,323	\$ 4,343,905,578	\$ 209,533,717
Guaranteed Separate Account	30,871,258	171,010	32,938,403	973,603	63,809,661	1,144,613
Total	\$ 1,887,012,222	\$ 21,683,404	\$ 2,520,703,017	\$ 188,994,926	\$ 4,407,715,239	\$ 210,678,330

- (5) The Company performs quantitative and qualitative analysis to determine if a decline in fair value is temporary. For those securities where the decline is considered temporary, the Company did not take an impairment when it had the ability and intent to hold until recovery. Factors considered in evaluating whether a decline in value is other than temporary include: i) whether the decline is substantial; ii) the duration that the fair value has been less than amortized cost; iii) the financial condition and near-term prospects of the issuer; and iv) the Company's ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value. In addition, for the Non-Agency Residential mortgage backed securities ("RMBS") portfolio, the Company updates cash flow projections monthly. The projections are done for each security based upon the evaluation of prepayment, delinquency, and default rates for the pool of mortgages collateralizing each security, and the projected impact on the course of future prepayments, defaults, and loss in the pool of mortgages, but do not include market prices. As a result, forecasts may change from period to period and additional impairments may be recognized over time as a result of deterioration in the fundamentals of a particular security or group of securities and/or a continuation of heightened mortgage defaults for a period longer than the assumptions used for the forecasts. Both qualitative and quantitative factors are used in creating the Company's RMBS cash flow models. As such, any estimate of impairments is subject to the inherent limitation on the Company's ability to predict the aggregate course of future events. It should therefore be expected that actual losses may vary from any estimate and the Company may recognize additional other-than-temporary losses.

E. Repurchase Agreements and/or Securities Lending Transactions

- (1) - (2) No change.
- (3) Collateral Received
 - a. No change.
 - b. The Company has not sold or repledged collateral received from dollar repurchase or securities lending agreements. All collateral is received in cash.
 - c. No change
- (4) - (7) No change.

F. Real Estate

No change.

G. Investment in Low-Income Housing Tax Credits, ("LIHTC")

No change.

H. Restricted Assets

No change.

NOTES TO FINANCIAL STATEMENTS

I. Working Capital Finance Investments

Not applicable.

6. Joint Ventures, Partnerships and Limited Liability Companies

- A. No change.
- B. No change.

7. Investment Income

- A. No change.
- B. No change.

8. Derivative Instruments

- A – F. No change.

9. Income Taxes

- A – G. No change.

10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties

- A – C. No change.

D. Effective March 28, 2014, the Company and NYL Investors LLC (a wholly-owned subsidiary of the Company) entered into a revolving credit agreement whereby the Company has agreed to make loans to NYL Investors LLC in an amount up to, but not exceeding, \$250,000,000. As of September 30, 2014, the Company did not have any outstanding loans to NYL Investors LLC.

- E – L. No change.

11. Debt

- A. No change.

B. Federal Home Loan Bank ("FHLB") Agreements

(1) On February 26, 2008, the Company became a member of the FHLB of NY and began issuing funding agreements to the FHLB of NY in exchange for cash. The proceeds from the sale of these funding agreements are invested to earn a spread on the business. The funding agreements are issued through the general account and are included in the liability for deposit funds on the balance sheet. When a funding agreement is issued, the Company is required to post collateral in the form of eligible securities including mortgage-backed, government and agency debt instruments for each of the advances received. Upon any event of default by the Company, the FHLB of NY's recovery on the collateral is limited to the amount of the Company's liability to the FHLB of NY.

(2) FHLB Capital Stock

a. Amount of FHLB capital stock held, in aggregate, is as follows:

1. Current Year

	1 Total 2+3	2 General Account	3 Separate Accounts

Membership Stock - Class B	38,134,000	38,134,000	-
Activity Stock	72,000,000	72,000,000	-
Excess Stock	-	-	-
Aggregate Total	\$ 110,134,000	\$ 110,134,000	\$ -
Actual or Estimated Borrowing Capacity as Determined by the Insurer	\$ 6,622,722,573	\$ 6,622,722,573	\$ -

2. Prior Year

	1 Total 2+3	2 General Account	3 Separate Accounts
Membership Stock - Class A	\$ -	\$ -	\$ -
Membership Stock - Class B	51,151,900	51,151,900	-
Activity Stock	65,250,000	65,250,000	-
Excess Stock	-	-	-
Aggregate Total	\$ 116,401,900	\$ 116,401,900	\$ -
Actual or Estimated Borrowing Capacity as Determined by the Insurer	\$ 6,174,411,643	\$ 6,174,411,643	\$ -

The FHLB borrowing capacity for the Company is determined using 5% of the Company's total admitted assets at the current reporting date, less any secured borrowing amounts.

NOTES TO FINANCIAL STATEMENTS

b. Membership Stock (Class A and B) Eligible for Redemption is as follows:

	Current Year Total	Not Eligible For Redemption	Less Than 6 Months	6 Months to Less Than 1 Year	1 To Less Than 3 Years	3 to 5 Years
Membership Stock						
Class A	\$ -	-	-	-	-	\$ -
Class B	\$ 38,134,000	-	-	-	-	\$ 38,134,000

(3) Collateral Pledged to FHLB is as follows:

a. Amount Pledged as Collateral as of Reporting Date

	Fair Value	Carrying Value	Aggregate Total Borrowing
1. Current Year Total General and Separate Accounts	\$ 2,864,712,439	\$ 2,615,002,095	\$ 1,600,905,897
2. Current Year General Account	\$ 2,864,712,439	\$ 2,615,002,095	\$ 1,600,905,897
3. Current Year Separate Accounts	\$ -	\$ -	\$ -
4. Prior Year Total General and Separate Accounts	\$ 3,235,454,743	\$ 2,978,498,555	\$ 1,451,131,477

b. Maximum Amount of Collateral Pledged During Reporting Period

	Fair Value	Carrying Value	Amount Borrowed at Time of Maximum Collateral
1. Current Year Total General and Separate Accounts	\$ 3,222,195,394	\$ 2,927,264,642	\$ 1,600,905,897
2. Current Year General Account	\$ 3,222,195,394	\$ 2,927,264,642	\$ 1,600,905,897
3. Current Year Separate Accounts	\$ -	\$ -	\$ -
4. Prior Year Total General and Separate Accounts	\$ 3,869,654,014	\$ 3,419,108,065	\$ 1,451,779,339

(4) Borrowing from FHLB is as follows:

a. Amount Borrowed as of Reporting Date

1. Current Year

	1 Total 2+3	2 General Account	3 Separate Accounts	Funding Agreements Reserves Established
Debt	\$ -	\$ -	\$ -	XXX

c. FHLB Borrowings Subject to Prepayment Obligations

	Does the Company have prepayment obligations under the following arrangements (YES/NO)?
Debt	N/A
Funding Agreements	No
Other	N/A

NOTES TO FINANCIAL STATEMENTS

12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A. Defined Benefit Plans

(1) – (3) No change.

(4) The components of net periodic benefit costs are as follows (in millions):

	For the period ended September 30,			
	Pension Benefits		Postretirement Benefits	
	2014	2013	2014	2013
Components of net periodic benefit cost:				
Service cost	\$ 100	\$ 112	\$ 22	\$ 27
Interest cost	218	199	55	52
Expected return on plan assets	(278)	(240)	(29)	(25)
Amortization of losses	68	137	8	20
Amortization of prior service cost	10	11	12	13
Net periodic benefit cost	\$ 118	\$ 219	\$ 68	\$ 87

(5) – (21) No change.

B – I. No change.

13. Capital and Surplus, Shareholders' Dividend Restrictions and Quasi-Reorganizations

(1) - (13) No change.

14. Contingencies

A. Contingent Commitments

No change.

B. Assessments

No change.

C. Gain Contingencies

Not applicable.

D. Claims Related Extra Contractual Obligations and Bad Faith Losses Stemming from Lawsuits

No change.

E. All Other Contingencies

No change.

15. Leases

A. Lessee Leasing Arrangements

No change.

B. Significant Leasing Agreements

Not applicable.

16. Information about Financial Instruments with Off-Balance Sheet Risk and Financial Instruments with Concentrations of Credit Risk.

No change.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

A. Transfers of Receivables Reported as Sales

Not applicable.

B. Transfer and Servicing of Financial Assets

(1) No change.

(2) - (7) Not applicable.

C. Wash Sales

(1) In the course of the Company's asset management, securities are not sold and reacquired within 30 days of the sale date to enhance the Company's yield on its investment portfolio. There may be occasional isolated incidents where wash sales occur.

NOTES TO FINANCIAL STATEMENTS

- (2) The details of the Company's wash sales with an NAIC rating designation of 3 or below, or unrated, of securities sold during the three months ended September 30, 2014 and reacquired within 30 days of the sale date are as follows:

Description	NAIC Designation	Number of Transactions	Book Value of Securities Sold	Cost of Securities Repurchased	Gain/(Loss)
Bonds	NAIC 3	1	\$ 2,425,290	\$ 2,441,118	\$ (15,828)
	NAIC 4	4	\$ 818,856	\$ 824,790	\$ (5,934)

18. Gain or Loss to the Insurer from Uninsured Plans and the Uninsured Portion of Partially Insured Plans

Not applicable.

19. Direct Premium Written/Produced by Managing General Agents/Third Party Administrators

No change.

20. Fair Value Measurements

- A. The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, *Fair Value Measurements*. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement.

- (1) The levels of the fair value hierarchy are based on the inputs to the valuation as follows:

- Level 1** Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. Active markets are defined as a market in which many transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2** Observable inputs other than level 1 prices, such as quoted prices in active markets for similar assets or liabilities; quoted prices in markets that are not active for identical or similar assets or liabilities, or other model driven inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs.
- Level 3** Instruments whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions in pricing the asset or liability. Pricing may also be based upon broker quotes that do not represent an offer to transact. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the Company's understanding of the market, and are generally considered Level 3. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3.

NOTES TO FINANCIAL STATEMENTS

- (1) The following table presents the balances of assets and liabilities measured at fair value as of September 30, 2014:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
a. Assets at fair value				
1. Preferred stocks				
Redeemable preferred stock	\$ -	\$ 1,572,500	\$ -	\$ 1,572,500

Common Stock	94,815,640	-	(58,738)	(105,071)	(1,094,160)	34,249,993	-	(12,724,551)	-	-	115,083,113
Separate Account Assets ⁽¹⁾	779,927,900	-	(76,109,736)	15,967,232	(84,498)	35,177,033	-	(43,132,493)	(32,724)	711,712,714	
Total	\$ 891,318,726	\$ -	\$ (78,149,854)	\$ 16,429,711	\$ (1,404,108)	\$ 69,914,180	\$ -	\$ (55,857,044)	\$ (731,105)	\$ 841,520,507	

⁽¹⁾ The total gains or (losses) included in Surplus for separate account assets are offset by an equal amount for separate account liabilities, which results in a net zero impact on surplus for the Company.

NOTES TO FINANCIAL STATEMENTS

Transfers between levels

Transfers between levels may occur due to changes in valuation sources, changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads, or as a result of a security measured at amortized cost at the beginning of the period, but measured at estimated fair value at the end of the period, or vice versa, due to a ratings downgrade or upgrade. For the separate accounts, transfers are mostly related to changes in the redemption restrictions of limited partnerships ("LPs") and hedge fund investments. The Company's policy is to assume the transfer occurs at the beginning of the period.

Transfers between Levels 1 and 2

During the three months ended September 30, 2014, there were no transfers between Levels 1 and 2.

Transfers into and out of Level 3

The Company's basis for transferring assets and liabilities into and out of Level 3 is based on changes in the observability of data, change in the security's measurement or changes in redemption restrictions of certain separate account investments.

There were no transfers into Level 3 for the three months ended September 30, 2014. Transfers out of Level 3 were \$78,149,854 for the three months ended September 30, 2014, which mainly included \$76,109,736 of separate account assets resulting from an increase in hedge fund investments meeting the level 2 redemption period threshold at quarter-end, and \$1,981,380 of non-agency commercial mortgage-backed securities that were rated a 6 and valued at level 3 at the beginning of the period, to being rated a 5 and valued at Level 2 at the end of the period.

(3) Determination of Fair Value

The Company has an established and well-documented process for determining fair value. Security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from nationally recognized third party pricing services. For most private placement securities, the Company applies a matrix-based pricing methodology, which uses spreads derived from third party benchmark bond indices. For private placement securities that cannot be priced through these processes, the Company uses internal models and calculations. All other securities are submitted to independent brokers for prices. The Company performs various analyses to ascertain that the prices represent fair value. Examples of procedures performed include, but are not limited to, back testing recent trades, monitoring of trading volumes, and performing variance analysis of monthly price changes using different thresholds based on asset type. The Company also performs an annual review of all third-party pricing services. During this review, the Company obtains an understanding of the process and sources used by the pricing service to ensure that they maximize the use of observable inputs, the pricing service's frequency of updating prices, and the controls that the pricing service uses to ensure that their prices reflect market assumptions. The Company also selects a sample of securities and obtains a more detailed understanding from each pricing service regarding how they derived the price assigned to each security. Where inputs or prices do not reflect market participant assumptions, the Company will challenge these prices and apply different methodologies that will enhance the use of observable inputs and data. The Company may use non-binding broker quotes or internal valuations to support the fair value of securities that go through this formal price challenge process. At September 30, 2014, the Company challenged the price it received from third party pricing services on securities with a book value of \$27,810,090 and a market value of \$28,775,992. The Company used its internal valuations to determine the fair value of these securities.

In addition, the Company has a pricing committee that provides oversight over the Company's prices and fair value process for securities. The committee is comprised of representatives from the Company's Investment Management group, Controller's Department, Compliance Department and Securities Operations. The committee meets quarterly and is responsible for the review and approval of the Company's valuation procedures. The committee is also responsible for the review of pricing exception reports as well as the review of significant inputs used in the valuation of assets that are valued internally.

For Level 1 investments, valuations are generally based on observable inputs that reflect quoted prices for identical assets in active markets.

The fair value for Level 2 and Level 3 valuations are generally based on a combination of the market and income approach. The market approach generally utilizes market transaction data for the same or similar instruments, while the income approach involves determining fair values from discounted cash flow methodologies.

The following represents a summary of significant valuation techniques for assets and liabilities used to determine fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Level 1 measurements

Common stock

These securities are comprised of exchange traded U.S. and foreign common stock and mutual funds. Valuation of these securities is based on unadjusted quoted prices in active markets that are readily and regularly available.

Separate account assets

These assets are comprised of cash, exchange traded funds, common stocks and actively traded open-end mutual funds with a daily net asset value ("NAV"). The NAV can be observed by redemption and subscription transactions between third parties, or may be obtained from fund managers. Therefore the fair values of these investments have been reflected within Level 1 in the fair value hierarchy. Common stocks are generally traded on an exchange.

Separate account liabilities – derivatives

These derivatives are comprised of exchange traded future contracts. Valuation of these securities is based on unadjusted quoted prices in active markets that are readily and regularly available.

NOTES TO FINANCIAL STATEMENTS

Level 2 measurements

Preferred stocks

The fair value of preferred stock is obtained from third party pricing services. Vendors generally use a discounted cash flow model or a market approach to arrive at the security's fair value.

Bonds

The fair value of bonds is obtained from third party pricing services, matrix-based pricing, internal models or broker quotes. Third party pricing services generally use a discounted cash-flow model or a market approach. Typical inputs used by these pricing sources include, but are not limited to: benchmark yields, reported trades, issuer spreads, bids, offers, benchmark securities, estimated cash flows and prepayment speeds, which the Company has determined are observable inputs.

Private placement securities are primarily priced using a matrix-based pricing methodology, which uses spreads derived from third party benchmark bond indices. Specifically, the Barclays Credit Index ("BCI") is used for investment-grade securities and the Citi High Yield Cash Index ("CHYI") is used for below investment-grade securities. These indices are two widely recognized, reliable, and well regarded benchmarks by participants in the financial services industry, which represent the broader U.S. public bond markets.

Certain private placement securities that cannot be priced using the matrix pricing described above, are priced by an internally developed discounted cash flow model or are priced based on internal calculations. The model uses observable inputs with a discount rate based off spreads of comparable public bond issues, adjusted for liquidity, rating and maturity. The Company assigns a credit rating for private placement securities based upon internal analysis. The liquidity premium is based upon observable market transactions, while the maturity and rating adjustments are based upon data obtained from Bloomberg. These securities are classified as Level 2.

For some of the private placement securities priced through the model, the liquidity adjustments may not be based on market data, but rather, calculated internally. If the impact of the liquidity adjustment, which usually requires the most judgment, is not significant to the overall value of the security, the security is still classified as Level 2.

Derivatives

The fair value of derivative instruments is generally derived using valuation models. The selection of a particular model depends upon the contractual terms of, and specific risks inherent in the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation model inputs include contractual terms, yield curves, foreign exchange rates, equity prices, credit curves, measures of volatility, and other factors. OTC derivatives that trade in liquid markets, where model inputs are observable for substantially the full term, are classified as Level 2.

Separate account assets

These are assets primarily related to investments in U.S. governments and treasury securities, corporate bonds, and mortgage-backed securities. These separate account assets are valued and assigned within the fair value hierarchy, consistent with the methodologies described herein for similar financial instruments held within the general account of the Company. This also relates to investments in LP and hedge funds that use NAV where the investment can be redeemed at NAV at the measurement date or in the near-term (generally 90 days).

Level 3 measurements

Bonds

The valuation techniques for most Level 3 bonds are generally the same as those described in Level 2. However, if the investments are less liquid or are lightly traded, there is generally less observable market data, and therefore these investments will be classified as Level 3. Circumstances where observable market data are not available may include events such as market illiquidity and credit events related to the security. In addition, certain securities are priced based upon internal valuations using significant unobservable inputs.

If the price received from third party pricing services does not appear to reflect market activity, the Company may challenge the price. For securities which go through this formal price challenge process, a non-binding broker quote or internal valuation is used to support the fair value instead. The Company also uses non-binding broker quotes to fair value certain bonds, when the Company is unable to obtain prices from third party vendors.

Private placement securities where adjustments for liquidity are considered significant to the overall price are classified as Level 3.

Common stock

These securities include equity investments with privately held entities, including a government organization, where the prices are derived from internal valuations.

Separate account assets

These are assets primarily related to LP investments and hedge funds that are restricted with respect to transfer or withdrawal (generally greater than 90 days).

- B. Not Applicable.

NOTES TO FINANCIAL STATEMENTS

- C.** The following table presents the aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall, summarized by type of financial instrument for which it is practicable to estimate fair value at September 30, 2014.

	Fair Value	Carrying Amount	Level 1	Level 2	Level 3	Not Practicable
Assets:						
Bonds	\$ 79,752,650,091	\$ 72,790,257,468	\$ -	\$ 78,231,734,327	\$ 1,520,915,764	\$ -

¹ Excludes investments accounted for under the equity method.

Bonds

The fair value of bonds is determined by considering one of four primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from nationally recognized third party pricing services, (2) securities are priced using a matrix-based pricing methodology, which uses spreads derived from third party benchmark bond indices, (3) securities are priced using an internal pricing model or methodology, and (4) securities are submitted to independent brokers for prices.

The pricing service generally uses a discounted cash-flow model or market approach to determine fair value. Typical inputs used by these pricing services include, but are not limited to: benchmark yields, reported trades, issuer spreads, bids, offers, benchmark securities, estimated cash flows and prepayment speeds.

Independent pricing vendors do not supply prices for private placement bonds. These securities are primarily priced using a matrix-based pricing methodology, which uses spreads derived from third party benchmark bond indices. Any private securities that cannot be priced using this methodology, are priced using an internally developed model based upon assigned comparable public issues adjusted for liquidity, maturity and rating, or are priced based on internal calculations. The Company assigns a credit rating based upon internal analysis.

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including initial and ongoing review of third party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics.

Mortgage loans

The estimated fair value of mortgage loans is determined based upon the present value of the expected cash flows discounted at an interpolated treasury yield plus a spread. The spread is based on management's judgment and assumptions and it takes into account property type, loan to value and remaining term of each loan. The spread is a significant component of the pricing inputs.

Common and preferred stocks

The fair value of unaffiliated equity securities is determined by considering one of three primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from third party pricing services, (2) the remaining un-priced securities are submitted to independent brokers for prices, and (3) securities are priced using an internal pricing model or methodology.

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including, initial and ongoing review of third party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics.

Other invested assets

Other invested assets are principally comprised of loans receivable from Madison Capital Funding LLC ("MCF"), LIHTC investments and investments in mortgage loan funds. The fair value of the MCF loans and the LIHTC investments is based on a discounted cash flow calculation using a discount rate that is determined internally. The fair value of the mortgage loan funds is determined based on the same methodology described above under Mortgage loans. For certain other investments included in this line, carrying value is deemed to approximate fair value.

Cash, cash equivalents and short-term investments

Due to the short-term maturities, the carrying value of short-term investments, cash and cash equivalents is presumed to approximate fair value.

NOTES TO FINANCIAL STATEMENTS

Derivatives

The fair value of derivative instruments is generally derived using valuation models, except for derivatives that are exchange-traded, which are valued using quoted prices in an active market. Where valuation models are used, the selection of a particular model depends upon the contractual terms of, and specific risks inherent in the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation model inputs include contractual terms, yield curves, foreign exchange rates, equity prices, credit curves, measures of volatility, and other factors.

Derivatives - collateral

The fair value of these assets and liabilities approximates carrying value since these borrowings are generally short-term in nature.

Separate account assets

Assets within the separate accounts are primarily invested in bonds and common stock. The fair value of investments in the separate accounts is calculated using the same procedures as are used for bonds and common stocks in the general account.

The separate account also invests in LP and hedge funds. The fair value of such partnerships is determined by reference to the LP's NAV. The valuation of the hedge funds is based upon the hedge funds' latest financial statements adjusted for cash activity since that date and estimates of market valuations.

Deposit fund contracts

For funding agreements backing medium term notes, fair values are based on available market prices for the notes. For other funding agreements and annuities certain liabilities, fair values are estimated using discounted cash flow calculations based on interest rates currently being offered for similar contracts with maturities consistent with those remaining for the contracts being valued.

For all other deposit funds, dividend accumulations and supplemental contracts, estimated fair value is equal to account value.

Borrowed money

Borrowed money consists of intercompany borrowings, repurchase agreements and other financing arrangements. Due to the short-term nature of the transactions, the fair value approximates carrying value.

Amounts payable under securities lending

Amounts payable under securities lending consists of cash collateral received under securities lending agreements. The fair value approximates carrying value.

Separate account liabilities – derivatives and deposit type contracts

For deposit type contracts, which are funding agreements, the fair value of the liability approximates carrying value.

For derivative instruments, fair value is determined using the same procedures as the general account disclosed above.

- D. If it is not practicable for an entity to estimate the fair value of that financial instrument or a class of financial instruments, the following shall be disclosed:
 - (1) – (2) Not applicable.

21. Other Items

A. Extraordinary Items

Not applicable.

B. Troubled Debt Restructuring: Debtors

Not applicable.

C. Other Disclosures and Unusual Items

No change.

D. Business Interruption Insurance Recoveries

Not applicable.

E. State Transferable and Non-Transferable Tax Credits

No change.

F. Subprime and Midprime Mortgage Related Risk Exposure

No change.

G. Retained Assets

No change.

NOTES TO FINANCIAL STATEMENTS

H. Offsetting and Netting of Assets and Liabilities

Not applicable.

I. Joint and Several Liabilities

Not applicable.

J. Risk Sharing Provisions of the Affordable Care Act ("ACA")

As of September 30, 2014, the Company wrote accident and health insurance premium which is subject to the Affordable Care Act risk sharing provisions.

1. Permanent ACA Risk Adjustment Program

Not applicable.

2. Transitional ACA Reinsurance Program

At September 30, 2014, the Company's liability for contributions payable due to ACA Reinsurance (not reported as ceded premium) was \$2,268.

3. Temporary ACA Risk Corridors Program

Not applicable.

22. Events Subsequent

As of November 13, 2014, the date the financial statements were available to be issued, there have been no events occurring subsequent to the close of the Company's books or accounts for the accompanying quarterly statement that would have a material effect on the financial condition of the Company.

23. Reinsurance

A. Ceded Reinsurance Report

Section 1 – General Interrogatories

No change.

Section 2 – Ceded Reinsurance Report – Part A

No change.

Section 3 – Ceded Reinsurance Report – Part B

No change.

B. Uncollectible Reinsurance

Not applicable.

C. Commutation of Ceded Reinsurance

Not applicable.

D. Certified Reinsurer Rating Downgraded or Status Subject to Revocation

Not applicable.

24. Retrospectively Rated Contracts and Contracts Subject to Redetermination

A – C. Not applicable.

D. No change.

25. Changes in Incurred Losses and Loss Adjustment Expense

Reserves as of December 31, 2013 were \$1,348,490,227. As of September 30, 2014, \$151,884,107 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$1,119,827,576 as a result of re-estimation of unpaid claims and claim adjustment expenses principally on group medical, disability income and long term care lines of insurance. Therefore, there has been a \$76,778,544 favorable prior-year development since December 31, 2013 to September 30, 2014. The increase is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. The Company experienced no unfavorable prior year loss development on retrospectively rated policies. However, the business to which it relates is subject to premium adjustments.

26. Intercompany Pooling Arrangements

Not applicable.

27. Structured Settlements

No change.

NOTES TO FINANCIAL STATEMENTS

28. Health Care Receivables

No applicable.

STATEMENT AS OF SEPTEMBER 30, 2014 OF THE NEW YORK LIFE INSURANCE COMPANY
GENERAL INTERROGATORIES

PART 1 - COMMON INTERROGATORIES

GENERAL

- 1.1 Did the reporting entity experience any material transactions requiring the filing of Disclosure of Material Transactions with the State of Domicile, as required by the Model Act? Yes [] No [X]
- 1.2 If yes, has the report been filed with the domiciliary state? Yes [] No []
- 2.1 Has any change been made during the year of this statement in the charter, by-laws, articles of incorporation, or deed of settlement of the reporting entity? Yes [] No [X]
- 2.2 If yes, date of change: _____
- 3.1 Is the reporting entity a member of an Insurance Holding Company System consisting of two or more affiliated persons, one or more of which is an insurer? Yes [X] No []
If yes, complete Schedule Y, Parts 1 and 1A.
- 3.2 Have there been any substantial changes in the organizational chart since the prior quarter end? Yes [X] No []
- 3.3 If the response to 3.2 is yes, provide a brief description of those changes.
All changes to New York Life's organizational chart made during the third quarter of 2014 have been made in the ordinary course of New York Life's business activities.
- 4.1 Has the reporting entity been a party to a merger or consolidation during the period covered by this statement? Yes [] No [X]
- 4.2 If yes, provide the name of the entity, NAIC Company Code, and state of domicile (use two letter state abbreviation) for any entity that has ceased to exist as a result of the merger or consolidation.

1 Name of Entity	2 NAIC Company Code	3 State of Domicile

5. If the reporting entity is subject to a management agreement, including third-party administrator(s), managing general agent(s), attorney-in-fact, or similar agreement, have there been any significant changes regarding the terms of the agreement or principals involved? Yes [] No [] N/A [X]
If yes, attach an explanation.
- 6.1 State as of what date the latest financial examination of the reporting entity was made or is being made. 12/31/2009
- 6.2 State the as of date that the latest financial examination report became available from either the state of domicile or the reporting entity. This date should be the date of the examined balance sheet and not the date the report was completed or released. 12/31/2009
- 6.3 State as of what date the latest financial examination report became available to other states or the public from either the state of domicile or the reporting entity. This is the release date or completion date of the examination report and not the date of the examination (balance sheet date). 06/08/2011
- 6.4 By what department or departments?
New York State Department of Financial Services in conjunction with representatives of the other zones established by the NAIC.
- 6.5 Have all financial statement adjustments within the latest financial examination report been accounted for in a subsequent financial statement filed with Departments? Yes [] No [] N/A [X]
- 6.6 Have all of the recommendations within the latest financial examination report been complied with? Yes [] No [] N/A [X]
- 7.1 Has this reporting entity had any Certificates of Authority, licenses or registrations (including corporate registration, if applicable) suspended or revoked by any governmental entity during the reporting period? Yes [] No [X]
- 7.2 If yes, give full information:
- 8.1 Is the company a subsidiary of a bank holding company regulated by the Federal Reserve Board? Yes [] No [X]
- 8.2 If response to 8.1 is yes, please identify the name of the bank holding company.
- 8.3 Is the company affiliated with one or more banks, thrifts or securities firms? Yes [X] No []
- 8.4 If response to 8.3 is yes, please provide below the names and location (city and state of the main office) of any affiliates regulated by a federal regulatory services agency [i.e. the Federal Reserve Board (FRB), the Office of the Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation (FDIC) and the Securities Exchange Commission (SEC)] and identify the affiliate's primary federal regulator.

(L) Licensed or Chartered - Licensed Insurance Carrier or Domiciled RRG; (R) Registered - Non-domiciled RRGs; (Q) Qualified - Qualified or Accredited Reinsurer; (E) Eligible - Reporting Entities eligible or approved to write Surplus Lines in the state; (N) None of the above - Not allowed to write business in the state.

STATEMENT AS OF SEPTEMBER 30, 2014 OF THE NEW YORK LIFE INSURANCE COMPANY

(a) Insert the number of L responses except for Canada and Other Alien.

Direct Ordinary premiums, Annuities and Individual Accident and Health premiums are allocated by States on the basis of the address to which the premium notice is sent. Single premiums are allocated according to the residence of the insured, owner, or annuitant or the address designated to which business communication should be sent. Group Life, Group Health, and Group Annuity contracts are allocated according to the residence of the individual for whom benefits are purchased or provided. Deposit-Type Funds are state distributed based on where the contract is issued. This is usually the state where the principal office of the plan sponsor is located. The plan sponsor is typically the employer who establishes the pension plan. Premium or annuities waived under disability or other contract provisions are shown in one sum on Line 93, columns 2, 3, 4, 5, 6, and 7. All US business are allocated by state regardless of license status. Dividends applied to pay renewal premiums and considerations for annuities are state distributed.
